

Twilight By: Stephanie Meyer

Twilight is a book about a girl named Bella who moves to a small town in Washington called Forks and falls in love with a mysterious guy named Edward. Bella eventually finds out that Edward and his family are actually vampires! However they are "vegetarian" and feed on animals instead of humans. Bella is still in danger every time she's with Edward, because it takes a lot of control for him to resist the temptation of human blood. They both love each other though and everything goes pretty well until they run into a group of normal and therefore human blood drinking vampires. One of them is James, a tracker who sets his sights on Bella. Read the book to find out if love can win in the end and keep Bella and Edward safe. Twilight is a great book for any teenage girl to read! It is very suspenseful with romance thrown in and is almost impossible to put down.
