Book Summary

Aria Vanir, psychic 12-year-old girl from Va. Beach, trusts only her mother with the knowledge of her predictions and remote viewings. When Aria connects with **technically and spiritually advanced aliens**—the Gallions—she confides in her best friend, Tommy Manger. His unexpected anger threatens to end their friendship.

Nashata, Queen Supreme of the Gallions, leads a diplomatic **mission** to Earth so she can make **peaceful first contact** with Aria.

When the Gallions beam Aria, Tommy, and Aria's tomboyish teen sister, Jackie, aboard their spaceship, Aria's typically passive mother makes a daring move to save her daughters. None of them realize that **the military has sent Aria's Navy SEAL father, William, on a mission to capture the peaceful aliens or destroy their spaceship.**
